Consent for Communication

Patients/Clients frequently request that we communicate with them by phone, voicemail, email or text. Cedar Valley Chiropractic Sport & Spine respects your right to confidential communications about your protected health information (PHI) as well as your right to direct how those communications occur. Since email and texting can be inherently insecure as a method of communication, we will only communicate with you by email or text with your written consent at the email address or phone number you provide to us below. Please be aware that if you have an email account through your employer, your employer may have access to your email.

When you consent to communicating with us by email or text you are consenting to email and texting communications that may not be encrypted. As well, voicemail or answering machine messages may be intercepted by others. Therefore, you are agreeing to accept the risk that your protected health information may be intercepted by persons not authorized to receive such information when you consent to communicating with us through phone, email or text. Cedar Valley Chiropractic Sport & Spine will not be responsible for any privacy or security breaches that may occur through voicemail, email or text communications that you have consented to.

You may choose to limit the type of email or text communication you have with us if you wish to limit your risk of exposing your protected health information to unauthorized persons. Please indicate below what types of correspondence you consent to receive by email or text.

I do not consent to any email or texting communication.
I consent to receiving communications via email and text including, but not limited to: communication about my medical condition, advice from my healthcare providers, the scheduling of appointments and/or other communications that do not eveal my protected health information.
E-mail address you are consenting to communicate through:
Phone number you are consenting to communicate through:
NOTICE OF PRIVACY PRACTICES SUMMARY
This summary discloses how health information about you may be used. A full notice of your privacy rights has also been provided to you. Cedar Valley Chiropractic uses health information about you for treatment, to obtain payment for treatment, to administrative purposes, and to evaluate the quality of care that you receive. Cedar Valley Chiropractic will not disclose your information to others unless you tell us to do so, or unless the law authorizes or requires us to do so. Cedar Valley Chiropractic may use your information to provide appointment reminders, information about treatment alternatives or other health-related issues. Cedar Valley Chiropractic may disclose your information for public health activities, health and safety, and/or governmental functions in order to comply with workers compensation laws and other regulations. You have a right to request estriction of your health records, report, and retain a copy of your health records, request communication of your information by alternative means at alternative locations, revoke your authorization and request an accounting of your health records. You may complain to the Privacy Officer, Dr. Jennifer Rasmussen, Dr. Nicholas Dugger, and to the Department of Health and Human Services if you believe your privacy rights have been violated. You will not be retaliated against for filing a complaint. Cedar Valley Chiropractic must maintain the privacy of protected health information, provide you with notice of its legal duties and privacy practices with respect to your health information, abide by the terms of the notice, notify you if it was unable to agree to the requested restriction on how your information is used or disclosed, accommodate reasonable requests you may nake to communicate with health information by alternative means or by alternative locations and obtain your written authorization to use or disclose your health information for reasons other than those listed above and permitted under law. This Summary of the Notice of Privacy Practices is

		ning it. It is important that you understand the ons before you sign if there is anything that is
The nature of the chiropractic adjus	stment	
I may use my hands, the table or a sm	all mechanical instrument or or "click" much like the r	actic is spinal (and extremity) manipulative therapy upon your body in such a way as to move your noise heard when you crack your knuckles. You p or feel the movement.
Other treatments		
Additional treatments may inclusuch as ice, heat, electrical muscle still	•	techniques that are similar to massage, modalities rcise.
Analysis/Examination/Treatment		
As a part of your visit you are of any procedures that you may have que		procedures as the Dr. deems necessary. Check
spinal manipulative therapy _	palpation	vital signs
range of motion testing	orthopedic testing	neurological testing
muscle strength testing	postural analysis	radiology testing
electrical muscle stimulation _	traction	hot/cold
rehabilitative exercise	soft tissue therapy –m	anual or instrument assisted

The material risks in the chiropractic adjustment.

_other

As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation. These complications include but are not limited to: fractures, disc injuries, dislocations, muscle strain, cervical myelopathy, and rib strains and separations. Some types of manipulations of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment. I will make every reasonable effort during your examinations to screen for contraindications to care such as previous stroke or osteoporosis; however, if you have a condition or develop a condition that would otherwise not come to my attention, it is your responsibility to inform me.

Probability of risks occurring

Fractures are rare occurrences and generally result from some unknown underlying weakness of the bone. Stroke has been the subject of tremendous disagreement. The incidences of stroke are exceedingly rare and are estimated to occur between one in one million and one in five million cervical adjustments. The other complications are also generally described as rare. The most common side effect is stiffness or soreness following treatment much like soreness after a deep tissue massage.

Availability and nature of other treatment options

Other treatment options for your condition may include:

- o Self-administered, over the counter analgesics, and rest
- o Medical care, physical therapy, Rx drugs such as NSAIDS, muscle relaxers, and pain-killers
- Possible surgical intervention (in some cases)

Risks and dangers of remaining untreated or not following through with the Dr.'s recommendations

Remaining untreated may allow the formation of adhesions and scar tissue and reduced mobility which may set up a pain reaction further reducing mobility. Over time, this process may complicate treatment making it more difficult and less effective the longer treatment is postponed. Not performing your home care plan such as ice, rehabilitation exercise, or activity modifications that the Dr. prescribes can lead to recurring episodes of symptoms that may lead to worsening of the condition and/or chronicity.

DO NOT SIGN UNTIL YOU HAVE READ AND FULLY UNDERSTAND THE ABOVE. PLEASE CHECK THE APPROPRIATE BOX AND SIGN BELOW.

I have read [] or have had read to me [] the above explanation of the chiropractic adjustment and related treatment. I have discussed any questions with Dr. Rasmussen, Dr. Dugger, or their staff and have had my questions answered to my satisfaction. By signing below I state that I understand any risks, have weighed the risks involved and have decided that it is in my best interest to undergo the treatment recommended. Having been informed I voluntarily give my consent to the treatment.
